## OUR PRIORITIES

1. We want to redevelop paved areas such as the Churchillplein and the site of the MOC to build affordable apartments, without harming the green areas of our town
2. We want to plant at least 150 additional trees in residential areas, and adapt our maintenance practices to increase biodiversity in parks, and on the shoulders of our roads.
3. We want to provide sustained funding of our public amenities, including the swimming pool and library. The library should be extended to house cultural facilities such as the cinematic centre.
4. We want to ensure that anyone that separates and recycles their domestic waste sees those efforts reflected in their municipal tax bill. For this, we intend to introduce a system of billing per weight unit of residual waste.
5. We want to act urgently and decisively to mitigate climate change and its effects. Though this requires the phasing out of gas heating, we need to ensure that alternative forms of heating are available to, and affordable for, everyone.
6. We want to develop a broad policy for the provision of essential support to all less affluent households in Voorschoten, with particular attention paid to those including children.
7. We want to increase the number of youth workers, to enhance our preventative programmes and increase opportunities for young people in Voorschoten.
8. We want to reduce bureaucracy and increase effectiveness of care, by providing clients and the professionals that help them with more autonomy in their decisions.
